VISION
2030

About Us

AKTREQCO was established in 2009 to provide contracting and trading services in the Saudi market, and we took the lead in the local market with the services of managing and executing of dewatering and groundwater transmission projects and Shoring ,Sheet Piling works and we were the hand contributing to the provision of road cleaning equipment services, airstrips , beaches and rain water drainage pumps for many vital projects, and we have added within our framework the services of clean-up, maintenance, operation, repair, electromechanical works and other Oil and Gas fields, Petrochemicals, Mining, Water and Sewage plants and factories, with the completion works of the integrated infrastructure for projects whether Industrial or commercial, and we depend on the expertise of the most skilled engineers and technicians and cooperation in some fields with international companies with high experience , believing that the expertise and trained staff is the insurmountable force and the ideal fort to achieve actual success.

Vision

We actively contribute to our work in the fields of contracting and trading, and provide products and services of the highest quality and professionalism to achieve the development and comprehensive growth which in turn is conducive to the movement of economic growth in Kingdom of Saudi Arabia in order to ensure more success and upgrade the level of the company locally and regionally.

Mission

Execute the projects with the highest international quality standards in record time, in accordance with the systems and regulations and achieving a qualitative leap in the field of contracting and trading in the Kingdom, which contributes to build a bright economic future in line with the vision of the Kingdom 2030.

Objectives

- Maintaining the company's position in the contracting market and achieving more success.
- To upgrade the level of the company by providing professional services that meets the requirements of clients.
- Managing and implementing projects with high accuracy in accordance with the quality and safety plans.
- Recruit a specific employee and providing new job opportunities for young men.
- Modernity and development of tools and equipment to complete projects with professionalism.

Our Services

The company is always seeking to gain the trust of clients and maintain their satisfaction and add modern technologies and professional team to execute the projects, wherefore we have set a flexible strategy that is scalable for the development and include several kinds of services and products that we provide to clients locally and regionally , the most important services we provide to our clients are the followings :

Projects

■ Water Transmission

- Transporting Water from wells to Rigs through flexible water hoses or HDP pipes or any others kinds of pips, and provide dewatering and booster pumps with the necessary fuel and work crew which have experience in the preparation, operation, maintenance of the system and the troubleshooting as required.
- Hoses Rig Up/Down.
- Water Networks.
- Water Substations.

Projects

Infrastructure Works

We provide a design, execution, maintenance and operation of infrastructure services for cities, buildings, ports, islands, industrial facilities, refineries, oil and gas fields, power and water plants, including the works of rain drainage and sanitation systems, electromechanical works, and advanced technology solutions.

Through our long experience in the dewatering technology and designing the necessary systems, we provide optimal engineering solutions taking in consideration environment protection, quality, effectiveness in terms of cost & project schedule and develop of practical and flexible systems of draining groundwater or surface water from a riverbed, construction site, caisson, or mine shaft, by pumping or evaporation which meets the requirements of various projects using several methods of water suction, such as the following methods:

■ Deep Wells

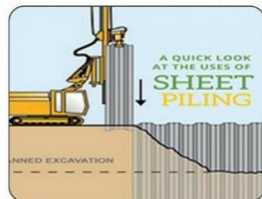

■ Well Point

We also provide the process of temporarily supporting a building, vessel, structure, or trench when in danger of collapse which are usually coming at initial stages of a construction projects or during repairs & modifications,

The supporting materials are metal or wooden and may be vertical, angled or horizontal. We are using several methods as the following:

■ Sheet Piling

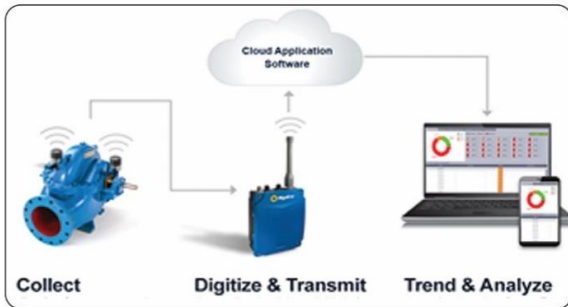

■ Shoring

Projects

■ Condition Monitoring

Unplanned interruptions in expensive and critical or long-term equipment can lead to costly interruptions in operations, we provide systems in collaboration with a global & specialists allies to monitor the validity and health of these equipment with finding predictions and analyses of its efficiency and we also solve failures and significantly extends the equipment lifecycle.

■ Testing and Inspection

AKTREQCO can provide specialized inspection to protect equipment in important facilities from damage, corrosion and fire, which may effect in reduction in production, We can also inspect the quality of smoke coming from industrial chimneys with a commitment to provide services of the highest quality to our clients.

■ Shutdown

By our understanding for the value of health, healthy system, safety and sanitation, we have added these activities with specialists staff, with the aim of providing these services to meet the needs of clients through close cooperation with them .

■ Cleaning

We provides a variety of industrial cleaning solutions, including the following :

- Tanks Cleaning.
- Pipelines Cleaning .
- Water Jetting .
- Removal of corrosion.
- Boilers Cleaning.
- Heat Exchanger Cleaning.

Projects

■ Water Treatment & Desalination

ACTREQCO has an exclusive partnership with the German company Watertec in designing, building, supplying, operating, maintaining and employee training of water treatment and desalination systems in the Kingdom of Saudi Arabia and the Gulf countries. The company was established in 1987 in Mainz and it is one of the first companies to manufacture seawater desalination systems in Germany, and through long experience In this field.

The company has implemented many desalination projects using Reverse Osmosis (RO) technology as it is considered the most economical & popular technology in the world.

■ Energy Saving

In cooperation with international and specialized companies in making evaluation studies of the current situation of electricity consumption, we provide solutions and suitable tools to reduce electricity consumption of production lines.

■ Smart Parking

AKTREQCO is an agent for Dayang Parking Co.Ltd, which specializes in the study, design, manufacture, installation and maintenance of horizontal and vertical mechanical smart parking equipment.

■ Treatments

We provide the service of treating soil from oil derivatives and others, we can handle the treating of hazardous and industrial wastes and petroleum waste by using new, advanced and environmentally, friendly technology.

Services

■ Maintenance and Repairs

We provides a variety of maintenance solutions and the necessary repairs for industrial equipment, including the following :

- Maintenance and repair of Pumps.
- Maintenance and repair of Lining systems in industrial , Kilns, Tanks, Ducts , Pipes and chimneys.
- Maintenance and repair of the Mechanical Seals .
- Maintenance and repair of Gas Turbines.
- Maintenance and repair of Air Compressors.
- Maintenance and repair of Generators.

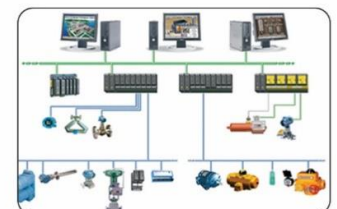

■ Road, Airstrips and Beach Cleaning Services

AKTREQCO has all the necessary equipment and trained staff for road, airstrips, and beaches cleaning works.

■ Control Systems

We provide survey service for the existing PLC, RTU&SCADA system, we can upgrade or replace them through the complete requirements like the designing, engineering, programming, commissioning and training.

Products

■ Pumps

AKTREQCO has Saudi Perfect Pumps Trading and Manufacturing Company, which is capable to make and supply pumps and its spare parts from 4 inch to 30 inch:

- Dewatering Centrifugal Pumps (100-3000 M3/hr.)
- Booster Pumps (300-5000 M3/hr)
- Double Suction Pumps.
- Chemical Self Priming Pumps.
- Slurry Mud Pumps.
- Diaphragm Pumps.
- Flushing Pumps.
- All type of Dewatering Submersible Pumps.
- Pump's engine spare part.

■ Hoses

We provide the best types of Flexible Hoses and Rubbery suction hoses which comes with its fittings; coupling that is through locally manufactured and our largest principles of manufacturers around the world.

■ Electrical Generators

We offer the best generators in terms of performance, durability and safety features ranging from 50 to 700 Kw.

Products

■ Road Cleaning Equipment

AKTREQCO is the exclusive agent in Saudi Arabia for SCHMIDT (German Company) , therefore we provide street cleaning equipment with the latest technology, whether it is a trailer or a carrier vehicle, with after-sales services such as maintenance and spare parts .

■ Airstrips Cleaning Equipment

AKTREQCO is the exclusive agent in Saudi Arabia for SCHMIDT (German company), therefore we provides the best cleaning equipment which aiming to the insure the security and safety of passengers and crew in the aviation sector ,We are providing after-sales services such as maintenance and spare parts .

■ Road Cleaning Equipment(BRODOWAY)

AKTREQCO is the exclusive agent in Saudi Arabia for SCHMIDT (German Company) , therefore We provide trailer cleaning equipment that is used in open areas with heavy sand, We are providing after-sales services such as maintenance and spare parts as well .

■ Beach Cleaning Equipment

AKTREQCO is the exclusive agent in Saudi Arabia for CANICAS (French Company), therefore we provide cleaning equipment that guarantees high quality sifting and high speed on dry or rainy sands with providing of after-sales services such as maintenance and spare parts.

■ Dumpers

AKTREQCO is the exclusive agent in Saudi Arabia for DUMEC (Italian Company) , therefore we offer small dumps with high quality components to ensure the best performance in any type of construction sites and long lifecycle with maximum safety .We are providing after-sales services such as maintenance and spare parts.

■ Recycling Containers

We provides recycling containers with all sizes and types.

Rental

■ Pumps

We provide pump rental services from 4 inch to 30 inch with the possibility of providing the necessary fuel and the work crew which have experience in the preparation, operation, maintenance of the system and the troubleshooting as required.

Dewatering Centrifugal Pumps (100-3000 M3/hr.)
Booster Pumps (300-5000 M3/hr.)
Double Suction Pumps.
Chemical Self Priming Pumps.
Slurry Mud Pumps.
Diaphragm Pumps.
Flushing Pumps.
All type of Dewatering Submersible Pumps.

■ Electrical Generators

We offer the rental service for best generators in terms of performance, durability and safety features ranging from 50 to 700 Kw .

Affiliates

■ Saudi Perfect Pumps Trading and Manufacturing Company:

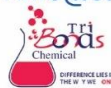

It is one of the largest manufacturing and contracting companies specialized in pumps and dewatering services in Saudi Arabia and it is the right arm of AKTREQCO Group, SAP Pumps has more than 30 years of common experience in manufacturing , sales, renting and dewatering contracts where the team have highly experiences and specialized in the field of pump manufacturing and dewatering functions.

It located in the eastern region -Al Khobar City, For more information, you can contact :

Phone : 00966138144586 Email : info@sap-pumps.com Website : www.sap-pumps.com

■ TriBonds Chemical Co.

The Company was founded in 2017 to establish localization position in Water Treatment Services in Saudi. Partnering with global organizations to maximize local product manufacture, by localizing technology and creating new opportunities in line with the kingdom 2030 vision via expert team in manufacturing, sales, technical services, and R&D
